PROFESSIONAL PROFILE

Junior Rigging Artist and Technical Animator with a background in programming, driven by solving complex rigging challenges. I work mainly in Maya and have experience developing Python tools and integrating rigs into video game engines and animation.

WORK EXPERIENCE

Freelance Dec. 2025 - Present
3D Rigging Artist

- Currently working on multiple projects under non-disclosure agreements (NDA).
- Combining professional work with continuous study and improvement of skills in rigging techniques and Python tool development.

Bone Garden Apr. 2026 - Jul. 2026
3D Rigging Artist Remote

- Responsible for the rigging of a six-legged arachnoid robot and creating Python tools to improve pipeline workflow for an unannounced film.
- Developed the pipeline to rig and animate a proxy version, to later transfer the animation to the final model.

24Pack Jun. 2025 - Oct. 2025
3D Rigging Artist

- Developed the rig for a bipedal robot and various props compatible with Unreal Engine for the video game *Not My War*.
- Resolved technical and asset compatibility issues during integration into Unreal Engine, as well as optimization and supervision of the rigs.

Freelance Jul. 2022 - Jan. 2025
Video Game QA and Localization

- Contributed to AAA titles such as *Black Myth: Wukong*, serving as a Localization Editor for text review.
- Performed Design Analyst and QA duties in the indie sector for games like *Vegangsters* (exhibited at the Indie Dev Day in Barcelona), as well as other titles published on Steam, Play Store, and App Store.

EDUCATION

U-tad 2024 - 2025
Master's in Rigging and Character FX

- Final Project: Advanced quadruped rig recreating Maya constraints using matrices and a Python tool to generate limbs from locators.

CITM, UPC 2020 - 2024
Bachelor's Degree in Video Game Design and Development

- Final Project: Bipedal animal rig optimized for Unreal Engine. Additionally, I performed animation retargeting within the engine to demonstrate and validate the proper functioning of the rig.

SKILLS, SOFTWARE & LANGUAGES

Skills: Python (Intermediate); C#/C++ (Basic); Game Design & Development; QA Tester.

Software: Autodesk Maya (Advanced); Unreal Engine (Intermediate); Blender (Basic); Houdini (Basic).

Languages: Catalan (Native); Spanish (Native); English (C1).
